

Barangay and Resident's Information System

Keeping Barangay records is a one way to easily track resident's information. BaRIS is capable in recording this bulk information and can be stored in a long period of time. This system can meet strategic objectives for reducing paper consumption and reducing time consuming file retrieval from bulky documents. BaRIS can also track residents record such as personal to family information, complaints to amicable settlement information and can create daily reports for the Barangay. It is a control system that manages the process industrial workspace. It reduces human error and process time, thus it can boost productivity and result into high quality of product produce

Services

In the extent of implementation of the basic services and facilities in the barangay as mandated in Section 17 of the Local Government Code of 1991, the indicators were as follows: Agricultural Support Services, Health and Social Welfare Services, Services and Facilities Related to General Hygiene and Sanitation, Beautification and Solid Waste Collection, Maintenance of the Katarungang Pambarangay, Maintenance of the Barangay Roads and Bridges and Water Supply System, Infrastructure Facilities, Information and Reading Center, and Satellite or Public Market.

How To's

Providing step by step procedure for some features of the system which can help the user to adapt faster so they can maximize the benefits of using the website. Below are the videos that which you can watch to help you understand and follow [Barangay Registration, Installing Progressive Web Application on devices, etc.].

VID_001: Installing to device from browser.

VID_002: Barangay Registration.

Development Team

Students at Technological University of the Philippines - Manila S.Y. 2021-2022 taking Bachelor of Science in Information Technology. The development of this website is one of the final requirement for them to be qualified to graduate.
