Barangay and Resident's Information System

Keeping Barangay records is a one way to easily track residentU+2019s information. BARIS is capable in recording this bulk information and can be stored in a long period of time. This system can meet strategic objectives for reducing paper consumption and reducing time consuming file retrieval from bulky documents. BARIS can also track residents record such as personal to family information, complaints to amicable settlement information and can create daily reports for the Barangay. It is a conntrol system that manages the process industrial workspace. It reduces human error and processign time, thus it cann boost productivity and result into high quality of prduct produce

Services

In the extent of implementation of the basic services and facilities in the barangay as mandated in Section 17 of the Local Government Code of 1991, the indicators were as follows: Agricultural Support Services, Health and Social Welfare Services, Services and Facilities Related to General Hygiene and Sanitation, Beautification and Solid Waste Collection, Maintenance of the Katarungang Pambarangay, Maintenance of the Barangay Roads and Bridges and Water Supply System, Infrastructure Facilities, Information and Reading Center, and Satellite or Public Market.

backup database and system user level security preventing unauthorized personnel to access the information

system. You can get a documents such as barangay clearance, business permit or cedula by providing a corresponding requirements

that can track location, cost, acquisition date and condition of the property. The system can speedily generate inventory with accuracy

The ability of BaRIS to monitor Residents Information and Business information status is an essential feature that may help Barangay Officials in decision making to formulate solutions, corresponding recommendations and appropriate positive actions

The system facilitates the speedy processing of data which help employees increase their productivity and allows other important tasks to be devoted to rather than spending their time in manual manipulations of record that is time consuming

The system helps its users to have a convinient way of communication where user can easily share announcements, events and pictures so that every user will always be updated.
How To's

Providing step by step procedure for some features of the system which can help the user to adapt faster so they can maximize the benefits of using the website. Below are the videos that which you can watch to help you understand and foll [Barangay Registration, Installing Progressive Web Application on devices, etc.].

VID_001: Installing to device from browser.

VID_002: Barangay Registration.

Development Team
